

ListManager Interface Changes 9.0 ->9.1

For users of Version 9.0.

A-Z Indexing for large lists

On pages with long lists of entries (e.g. the comprehensive list of lists or list administrators, or when working with segments), an alphabetical index will be available at the top of the viewtable to assist in navigating the list of entries shown. By clicking on a letter, only list entries starting with that letter will display, helping users to more easily find the entry they're looking for.

Map Report of Mailing

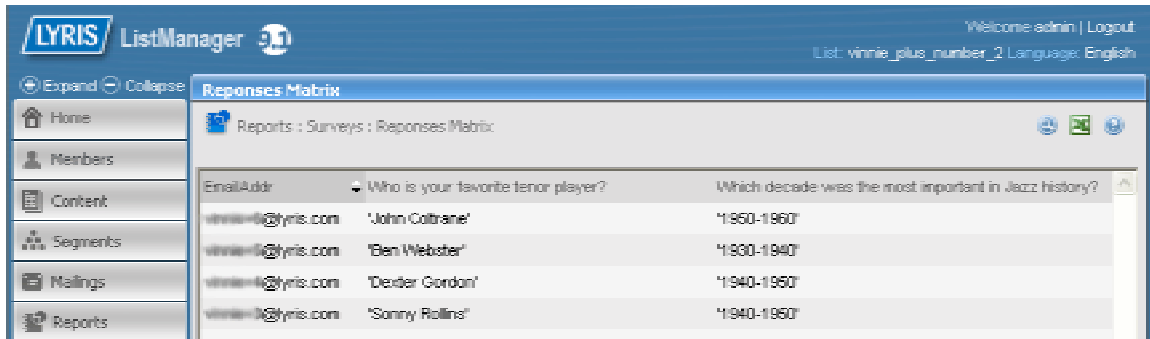

ListManager now offers a Map Report, showing geographically where your e-mails are being sent throughout the U.S. Powered by YahooMaps, the Map Report will display a map of the country and for each state, will provide statistics on how the recipients in that state responded to your mailing (i.e. opens, clicks, etc.). Requires "add member columns" capability.

ListManager Interface Changes 9.0 ->9.1

Survey Responses Matrix

This is a new report for surveys that breaks down each question and the responses given.

EmailAddr	Who is your favorite tenor player?	Which decade was the most important in Jazz history?
vinnie@lyris.com	'John Coltrane'	'1950-1960'
vinnie@lyris.com	'Ben Webster'	'1930-1940'
vinnie@lyris.com	'Dexter Gordon'	'1940-1950'
vinnie@lyris.com	'Sonny Rollins'	'1940-1950'
